

## **Rain Dayes Jackets**

The Idea behind the website is to sell Jackets and target customers aged between 20 and above, both for male and female.

Design should be easy and clear for everyone and simple as well. The era of speed of purchasing is very important because people nowadays want everything to be faster.

Website Header you can see that I have my logo in the left side and in topp off middel to choose if you are looking at jackets as Male or Female. Right corner at Header you should find the customer “log in/register” or shopping cart.

When Customers are in a shopping cart, customers are able to check items and fill out info about payment and shipping etc, which makes it faster.
